PROJECTS

LeanOnMe | [live](#) | [github](#) | (React/Redux, Python, Flask, SQLAlchemy, Psycopg2, Alembic)

- LeanOnMe is a calorie tracking app that helps you track your calories throughout the day. A challenge I had to overcome was designing and implementing an intuitive UI on my own.
- LeanOnMe has two main CRUD features that allows users to create a daily nutrition goal to strive towards as well as a food log to track what you've eaten over the course of the day.
- Something I felt proud of was the development of the logic within my backend api routes. The second CRUD feature relies on the first CRUD to be implemented

CoinFlip | [live](#) | [github](#) | (React/Redux, Javascript, Python, Flask, SQLAlchemy, Psycopg2, Alembic)

- CoinFlip is a clone of Robinhood that focuses specifically on cryptocurrencies. Users are able to buy and sell different cryptocurrencies based on the current market prices with fake funds.
- CoinFlip also has a watchlist feature that allows a user to keep track of various different cryptos as well as see how their portfolio does over time.
- Utilizes Coin Gecko's API for live news and cryptocurrency prices

Kelp | [live](#) | [github](#) | (React/Redux, Express, Sequelize, PostgreSQL)

- Kelp is a clone of Yelp that only has pescatarian, vegetarian, and vegan restaurants.
- Users are able to search for restaurants, and write reviews as well as leave ratings.
- Users are also able to get directions to the restaurant location using google maps

Two Left Thumbs | [live](#) | [github](#) | (Pug, Express, Sequelize, PostgreSQL)

- Two Left Thumbs is a Stackoverflow clone for passionate video gamers on all platforms.
- Users can search for posts about various different games and strategies.
- Two Left Thumbs allows users to post questions as well answer another user's questions.

EXPERIENCE

Amazon Delivery Driver

Direct Delivery Service, Inc.

2020 - Jan 2021

Aug
